

IN THE SPECIFICATION

Please amend the specification as shown below:

On Page 3, Lines 6-10.

In response to the need in the industry, the present invention provides a colored iridescent film comprising a structure of substantially parallel layers wherein ~~alternate of the layers comprise a first polymer and the remaining layers comprise a second polymer~~ of alternating layers of a first polymer, and a second polymer, and at least one of the layers contains an organic pigment. It has been discovered that certain organic...
